S-4-LC DNA/RNA/LNA Synthesizer

4 to 8 Columns DNA/RNA/LNA
synthesizer.

Universal or standard CPG.

Variable synthesis scales up to
10 μ mol

Free programmable synthesis control.

Online trityl monitor for all columns
(collected all trityl)

New synthesis start on every position
while synthesis running.

10 amidite positions.

Wobbles (Mixed base capability).

Automated antisense oligo synthesis.

Cycle time : 2.5-3.5 minutes for
4-column synthesis.

Low reagent consumption.

Designed especially for long, **highest
purity oligos**

Very compact design.

Dimensions (HxLxW) cm:
25x25x30
